Mainstay Math Kits

Student Success is SMOOTH SAILING
with these TEKS-based kits!

Math Literacy Work Stations
Process

ENJOY the literature

ECHO the ideas

EXAMINE the pieces

EXTEND your thinking

EXPLORE other possibilities

EVALUATE your progress

The 6 E process establishes routines and procedures for students as they delve deeper into each math concept.

ENJOY the literature

Reading the quality selections will build on students' appreciation for both math and literature. These books bring a richness and creativity to the wonder of mathematics.

ECHO the ideas

After connecting with the literature, students are given the opportunity to express their thoughts in writing.

EXAMINE the pieces

To reach all learning styles and to ensure concept attainment, math manipulatives and "hands-on" activities are provided.

EXTEND your thinking

Students are challenged to apply the math concept in a different format or are given opportunities to be "creative."

EXPLORE other possibilities

Viewing web sites, using technology programs, and/or playing games further develops an understanding of the concept.

EVALUATE your progress

Students take quick assessments to show us what they know and tell us what they think about the kit experience.

These dual-language kits are:

Teacher Friendly because they are "all-inclusive" which saves the teacher time. All materials in one place.

Student Friendly because students are provided choices as they work in this highly interactive, collaborative, and engaging learning experience.

Each kit includes:

- ★ Two or three pieces of literature
- ★ Problem solving activity sheets
- ★ Hands-on manipulatives/craft items
- ★ Technology integration
- ★ Response sheet for writing all in one easily storable box!

Best Use:

- ★ Success Initiative
- ★ Tutoring
- ★ Differentiated Instruction
- ★ Small Group / Skill Reinforcement
- ★ Spanish-speaking Students.
- ★ RtI

Ready to order?

All kits are priced at \$75.95. You can select from a menu of more than 20 kits per grade level to specifically meet students' needs. You don't have to purchase all the kits on a grade level, although you will probably want to.

Order forms can be faxed or mailed and they are available on-line.

Mainstay Math Kits are available for grades PK-8 and were developed by a collaborative team.

The president of Mainstay Math, LLC Chris Woodworth, is currently a doctoral student at Stephen F. Austin University focusing her studies on School Improvement Reform. She has 32 years experience in public education. She has taught both on the elementary and secondary level and has trained throughout her career. As an Administrator her last position was as a Federal Programs Coordinator/Grant writer.

Professional Development is offered and encouraged in order to increase teacher capacity and the institutionalization of these TEKS-based math kits. We offer on-site training sessions customized to meet your needs. Contact Chris to make arrangements.
